2. It shall be unlawful to discharge to any natural outlet within the City, or in any area under the jurisdiction of said City, any sewage or other polluted waters, except where suitable treatment has been provided in accordance with subsequent provisions of this Ordinance.

(Code of Iowa, Sec. 364.12(3)(f))

3. Except as hereinafter provided, it shall be unlawful to construct or maintain any privy, privy vault, septic tank, cesspool, or other facility intended or used for the disposal of sewage.

4. The owner of any house, building, or property used for human occupancy, employment, recreation, or other purposes, situated within the City and abutting on any street, alley, or right-of-way in which there is now located or may in the future be located a public sanitary or combined sewer of the City, is hereby required at such owner's expense to install suitable toilet facilities therein, and to connect such facilities directly with the proper public sewer in accordance with the provisions of this Ordinance, provided that said public sewer is within one hundred fifty (150) feet of the property line. Billing for sanitary sewer service shall begin the date of official notice to connect to the public sewer.

(Code of Iowa, Sec. 364.12(3)(f))

(IAC 567-69.3(3))

6-2-5 PRIVATE SEWAGE DISPOSAL.

1. Where a public sanitary or combined sewer is not available under the provision of Section 6-2-4(4), the building sewer shall be connected to a private sewage disposal system complying with the provisions of this section.

2. Before commencement of construction of a private sewage disposal system the owner shall first obtain a written permit signed by the Superintendent. The application for such permit shall be made on a form furnished by the City, which the applicant shall supplement by any plans, specifications, and other information as are deemed necessary by the Superintendent. A permit and inspection fee as determined by Resolution of the City Council shall be paid to the City at the time the application is filed.

3. A permit for a private sewage disposal system shall not become effective until the installation is completed to the satisfaction of the Superintendent. The Superintendent shall be allowed to inspect the work at any stage of construction and, in any event, the applicant for the permit shall notify the Superintendent when the work is ready for final inspection, and before any underground portions are covered. The inspection shall be made within 72 hours of the receipt of notice by the Superintendent.

4. The type, capacities, location, and layout of a private sewage disposal system shall comply with all recommendations of the Department of Natural Resources of the State of Iowa and the Carroll County Health Department. No permit shall be issued for any private sewage disposal system employing subsurface soil absorption facilities where the area of the lot is less than 15,000 square feet. No septic tank or cesspool shall be permitted to discharge to any natural outlet.

5. At such times as a public sewer becomes available to a property served by a private sewage disposal system, as provided in 6-2-4(4), a direct connection shall be made to the public sewer in compliance with this Ordinance, and any septic tanks, cesspools, and similar private sewage disposal facilities shall be abandoned and filled with suitable material.

(Code of Iowa, Sec. 364.12(3)(f))

6. The owner shall operate and maintain the private sewage disposal facilities in a sanitary manner at all times, at no expense to the City.

7. No statement contained in this section shall be construed to interfere with any additional requirements that may be imposed by the County Health Officer.

8. When a public sewer becomes available, the building sewer shall be connected at the building owner's expense, to said sewer within sixty (60) days and the private sewage disposal system shall be cleaned of sludge and filled with clean bank-run gravel or dirt.

(Code of Iowa, Sec. 364.12(3)(f))

6-2-6 BUILDING SEWERS AND CONNECTIONS.

1. No unauthorized person shall uncover, make any connections with or opening into, use, alter, or disturb any public sewer or appurtenance thereof without first obtaining a written permit from the Superintendent.

2. There shall be two (2) classes of building sewer permits: (a) for residential and commercial service, and (b) for service to establishments producing industrial wastes. In either

case, the owner or the owner's agent shall make application on a special form furnished by the City. The permit application shall be supplemented by any plans, specifications, or other information considered pertinent in the judgment of the Superintendent. Any permit inspection or connection fees as determined by Resolution of the City Council shall be paid to the City at the time the application is filed.

Before a permit may be issued for excavating for plumbing in any public street, way or alley, the person applying for such permit shall have executed unto the City of Templeton and deposited with the City Clerk a corporate surety in the sum of five thousand dollars (\$5,000.00) conditioned that the applicant will perform faithfully all work with due care and skill, and in accordance with the laws, rules and regulations established under the authority of any Ordinances of the City of Templeton pertaining to plumbing. This bond shall state that the person will indemnify and save harmless the City of Templeton and the owner of the premises against all damages, costs, expenses, outlay and claims of every nature and kind arising out of unskillfulness or negligence on the applicant's part in connection with plumbing or excavating for plumbing as prescribed in this Ordinance. Such bond shall remain in force and must be executed for a period of two (2) years except that on such expiration it shall remain in force as to all penalties, claims and demands that may have accrued thereunder prior to such expiration.

3. All cost and expense incident to the installation and connection of the building sewer shall be borne by the owner. The owner shall indemnify the City from any loss or damage that may directly or indirectly be occasioned by the installation of the building sewer.

4. A separate and independent building sewer shall be provided for every building, except where one building stands at the rear of another on an interior lot and no private sewer is available or can be constructed to the rear building through an adjoining alley, courtyard, or driveway, the building sewer from the front building may be extended to the rear building and the whole considered as one building sewer.

5. Old building sewers may be used in connection with new building sewers only when they are found, upon examination and testing by the Superintendent, to meet all requirements of this Ordinance. The Superintendent may require that the old sewer be excavated for the purpose of facilitating inspection. No old cesspool or septic tank shall be connected to any portion of a building sewer that is also connected to the public sewer. Cesspools and septic tanks shall be located, and drained in a manner approved by the Superintendent and removed or filled with sand, crushed rock or any other solid material approved by the Superintendent, except as exempted by the Superintendent.

6. The building sewer shall be constructed in accordance with applicable portions of the last published (State Plumbing Code of Iowa), applicable specifications of the American Society for Testing and Materials (ASTM) and applicable portions of the Water Pollution Control Federation (WPCF) Manual of Practice No. 9."

a. Each connection to the public sewer shall be made to the fittings designated for that property. If a fitting in the public sewer is not available for the designated property, the connection shall then be made under the direct supervision of the Superintendent. Connections

to the public sewer not made to an existing wye or tee shall be made by a hole-cutter or careful chisel cutting. The connection shall be rendered water and gas tight, by use of rubber gaskets. The building sewer shall not protrude into the public sewer.

b. All building sewers shall be constructed of the following materials conforming to the indicated standards:

Vitrified Clay Pipe VCP

(1) Pipe and Fittings - ASTM C-700 "Standard Specification or Vitrified Clay Pipe, Extra Strength, Standard Strength and Perforated."

(2) Coupling and Joints - ASTM C-425 "Standard Specification for Compression Joints for Vitrified Clay Pipe and Fittings".

Extra Heavy Cast Iron Soil Pipe

(1) Pipe and Fittings - ASTM A-74 "Standard Specification for Cast Iron Soil Pipe and Fittings."

(2) Joints - ASTM C-564 "Standard Specification for Rubber Gaskets for Cast Iron Soil Pipe and Fittings."

Polyvinyl Chloride (PVC)

Polyvinyl Chloride (PVC) and joints shall be installed according to the manufacturers' recommendations and shall conform to:

(1) Pipe - A.S.T.M. D-3034, "Type P.S.M. Poly (PVC) and Fittings."

Minimum wall thickness:

- 4" - 0.125"
- 6" - 0.180"
- 8" - 0.240"
- 10" - 0.300"

(2) Joints - A.S.T.M. D-1869, A.S.T.M. D-1312, "Flexible Elastomeric Seals."

c. No building sewer for residential or commercial buildings shall be less than four inches in diameter. No building sewer for industries or multiple dwellings shall be less than six inches in diameter.

d. Unless otherwise authorized, all building sewers shall have a grade of not less than one - eighth (1/8) inch per foot. A grade of one-fourth (1/4) inch per foot shall be used wherever practical.

e. All excavation shall be open trench work unless authorized by the Superintendent. The foundation in the trench shall be formed to prevent any subsequent settlement of the pipes. If the foundation is good firm earth, the earth shall be pared or molded to give a full support to the lower quadrant of each pipe. Bell holes shall be dug. Where the floor of the trench is of hard or rocky material, the trench shall be excavated to four inches below the pipe and brought back to the proper grade with gravel, coarse sand or similar material so as to provide a firm foundation and uniform support for the building sewer line. Backfilling shall be placed in layers and solidly tamped or packed up to two feet above the pipe. Back-filling shall not be done until final inspection is made by the Superintendent. Building sewers shall be laid straight at uniform grade between connections or fittings.

f. Cleanouts shall be provided for each change in direction or grade if the change exceeds 45 degrees and at least every 100 feet.

7. Whenever possible, the building sewer shall be brought to the building at an elevation below the basement floor. The depth shall be sufficient to afford protection from frost. All excavations required for the installation of a building sewer shall be open trench work unless otherwise approved by the said Superintendent. Pipe laying and backfill shall be performed in accordance with A.S.T.M. Specification (Designation C12). No backfill shall be placed until the work has been inspected by the Superintendent or the Superintendent's representative. In all buildings in which any building drain is too low to permit gravity flow to the public sewer, sanitary sewage carried by such building drain shall be lifted by an approved means and discharged to the building sewer.

8. No person shall make connection of roof downspouts, exterior foundation drains, areaway drains, sump pumps, or other sources of surface runoff or groundwater to a building sewer or building drain which in turn is connected directly or indirectly to a public sanitary sewer.

9. The connection of the building sewer into the public sewer shall conform to the requirements of the Plumbing Code or other applicable rules and regulations of the City, or the procedures set forth in appropriate specifications of the A.S.T.M. and the W.P.C.F. Manual of Practice No. 9. All such connections shall be made gastight and watertight. Any deviation from the prescribed procedures and materials must be approved by the Superintendent before installation.

10. Each and every part of the building sewer shall be inspected and approved by the Superintendent before being concealed or back-filled. The applicant for the building sewer permit shall notify the Superintendent when the building sewer is ready for inspection and connection to the public sewer. The connection shall be made under the supervision of the Superintendent or the Superintendent's representative.

11. All excavations for building sewer installation shall be adequately guarded with barricades and lights so as to protect the public from hazard. Streets, sidewalks, parkways, and

other public property disturbed in the course of the work shall be restored in a manner satisfactory to the City.

12. The City shall, in no event, be held responsible for claims made against it by reason of the breaking of any mains or service pipes, or by reason of any other interruption of the service caused by the breaking of machinery or stoppage for necessary repairs; and no person shall be entitled to damages nor have any portion of a payment refunded for any interruption.

13. The premises receiving sanitary sewer service, shall at all reasonable hours, be subject to inspection by duly authorized personnel of the City.

14. The Owner of the property served by a building sewer shall be responsible for the operation, maintenance, repair, blockage, surface replacement, and any damage resulting from operation, maintenance repair and blockage of said building sewer, from the point of connection with the building drain to the Public Sewer.

6-2-7 USE OF THE PUBLIC SEWERS.

1. No person shall discharge or cause to be discharged any storm water, surface water, groundwater, sump pump discharge, roof runoff, subsurface drainage, including interior and exterior foundation drains, uncontaminated cooling water, or unpolluted industrial process waters to any sanitary sewer. Applications may be cancelled and/or sewer service discontinued by the City for any violation of any rule, regulation or condition of service, and especially for any of the following reasons:

a. Misrepresented in the application as to the property or fixtures to be serviced by the sanitary sewer system.

b. Non-payment of bills.

c. Improper or imperfect service pipes and fixtures, or failure to keep same in suitable state of repair.

2. Storm water and all other unpolluted drainage shall be discharged to such sewers as are specifically designated as combined sewers or storm sewers, or to a natural outlet approved by the Superintendent. Industrial cooling water or unpolluted process waters may be discharged, on approval of the Superintendent, to a storm sewer, combined sewer, or natural outlet.

3. No person shall discharge or cause to be discharged any of the following described waters or wastes to any public sewers:

a. Any gasoline, benzene, naphtha, fuel oil, or other flammable or explosive liquid, solid, or gas.

b. Any waters or wastes containing toxic or poisonous solids, liquids, or gases in sufficient quantity, either singly or by interaction with other wastes, to injure or interfere with

any sewage treatment process, constitute a hazard to humans or animals, create a public nuisance, or create any hazard in the receiving waters of the sewage treatment plant, including but not limited to cyanides in excess of two (2) mg/l as CN in the wastes as discharged to the public sewer.

c. Any waters or wastes having a ph lower than 5.5, or having any other corrosive property capable of causing damage or hazard to structures, equipment, and personnel of the sewage works.

d. Solid or viscous substances in quantities of such size capable of causing obstruction to the flow of sewers, or other interference with the proper operation of the sewage works such as, but not limited to, ashes, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastics, wood, unground garbage, whole blood, paunch manure, hair and fleshings, entrails and paper dishes, cups, milk containers, etc., either whole or ground by garbage grinders.

e. Any water or wastes having (1) a 5-day bio-chemical oxygen demand greater than 300 parts per million by weight, or (2) containing more than 350 parts per million by weight, or suspended solids, or (3) having an average daily flow greater than 2 percent of the average sewage flow of the City, shall be subject to the review of the Superintendent. Where necessary in the opinion of the Superintendent, the owner shall provide at the owner's expense, such preliminary treatment as may be necessary to (1) reduce the biochemical oxygen demand to 300 parts per million by weight, or (2) reduce the suspended solids to 350 parts per million by weight, or (3) control the quantities and rates of discharge of such waters or wastes. Plans, specifications, and any other pertinent information relating to proposed preliminary treatment facilities shall be submitted for the approval of the Superintendent and no construction of such facilities shall be commenced until said approvals are obtained in writing.

4. No person shall discharge or cause to be discharged the following described substances, materials, waters, or wastes if it appears likely in the opinion of the Superintendent that such wastes can harm either the sewers, sewage treatment process, or equipment, have an adverse effect on the receiving stream, or can otherwise endanger life, limb, public property, or constitute a nuisance. In forming an opinion as to the acceptability of these wastes, the Superintendent will give consideration to such factors as the quantities of subject wastes in relation to flows and velocities in the sewers, materials of construction of the sewers, nature of the sewage treatment process, capacity of the sewage treatment plant, degree of treatability of wastes in the sewage treatment plant, and other pertinent factors. The substances prohibited are:

a. Any liquid or vapor having a temperature higher than one hundred fifty (150) F (65 C).

b. Any water or wastes containing fats, wax, grease or oils, whether emulsified or not, in excess of one hundred (100) mg/l or containing substances which may solidify or become viscous at temperatures between thirty-two (32) and one hundred fifty (150 F) (0 and 65 C).

c. Any garbage that has not been properly shredded. The installation and operation of any garbage grinder equipped with a motor of three-fourths (3/4) horsepower (0.76 hp metric) or greater shall be subject to the review and approval of the Superintendent.

d. Any waters or wastes containing strong acid iron pickling wastes, or concentrated plating solutions whether neutralized or not.

e. Any waters or wastes containing iron, chromium, copper, zinc, and similar objectionable or toxic substances, or wastes exerting an excessive chlorine requirement, to such degree that any such material received in the composite sewage at the sewage treatment works exceeds the limits established by the Superintendent for such materials.

f. Any waters or wastes containing phenols or other taste-or-odor-producing substances, -in such concentrations exceeding limits which may be established by the Superintendent as necessary after treatment of the composite sewage, to meet with requirements of the State, Federal, or other public agencies with jurisdiction for such discharge to the receiving waters.

g. Any radioactive wastes or isotopes of such half-life or concentration as may exceed limits established by the Superintendent in compliance with applicable State or Federal regulations.

h. Any waters or wastes having a pH in excess of 9.5.

i. Materials which exert or cause:

(1) Unusual concentrations of inert suspended solids (such as, but not limited to, Fullers earth, lime slurries, and lime residues) or of dissolved solids (such as, but not limited to, sodium chloride and sodium sulfate).

(2) Excessive discoloration (such as, but not limited to, dye wastes and vegetable tanning solutions).

(3) Unusual BOD, chemical oxygen demand, or chlorine requirements in such quantities as to constitute a significant load on the sewage treatment works.

(4) Unusual volume of flow or concentration of waters constituting "slugs" as defined herein.

j. Waters or wastes containing substances which are not amenable to treatment or reduction by the sewage treatment processes employed, or are amenable to treatment only to such degree that the sewage treatment plant effluent cannot meet the requirements of other agencies having jurisdiction over discharge to the receiving waters.

5. If any waters or wastes are discharged, or are proposed to be discharged to the public sewers, which waters contain the substances or possess the characteristics enumerated in 6-2-

5(4), and which in the judgment of the Superintendent, may have a deleterious effect upon the sewage works, processes, equipment, or receiving waters, or which otherwise create a hazard to life or constitute a public nuisance, the Superintendent may:

- a. Reject the wastes,
- b. Require pretreatment to an acceptable condition for discharge to the public sewers.
- c. Require control over the quantities and rates of discharge, and/or
- d. Require payment to cover the added cost of handling and treating the wastes not covered by existing taxes or sewer charges under the provision of 6-2-5(10) of this article.

If the Superintendent permits the pretreatment or equalization of waste flows, the design and installation of the plants and equipment shall be subject to the review and approval of the Superintendent, and subject to the requirements of all applicable codes, Ordinances, and laws.

6. Grease, oil, and sand interceptors shall be provided when, in the opinion of the Superintendent, they are necessary for the proper handling of liquid wastes containing grease in excessive amounts, or any flammable wastes, sand, or other harmful ingredients; except that such interceptors shall not be required for private living quarters or dwelling units. All interceptors shall be of a type and capacity approved by the Superintendent, and shall be located as to be readily and easily accessible for cleaning and inspection.

7. Where preliminary treatment or flow-equalizing facilities are provided for any waters or wastes, they shall be maintained continuously in satisfactory and effective operation by the owner at the owner's expense.

8. When required by the Superintendent, the owner of any property serviced by a building sewer carrying industrial wastes shall install a suitable control manhole together with such necessary meters and other appurtenances in the building sewer to facilitate observation, sampling, and measurement of the wastes. Such manhole, when required, shall be accessibly and safely located, and shall be constructed in accordance with plans approved by the Superintendent. The manhole shall be installed by the owner at the owner's expense, and shall be maintained by the owner so as to be safe and accessible at all times.

9. All measurements, tests, and analyses of the characteristics of waters and wastes to which reference is made in this Ordinance shall be determined in accordance with the latest edition of "Standard Methods for the Examination of Water and Wastewater," published by the American Public Health Association, and shall be determined at the control manhole provided, or upon suitable samples taken at said control manhole. In the event that no special manhole has been required, the control manhole shall be considered to be the nearest downstream manhole in the public sewer to the point at which the building sewer is connected. Sampling shall be carried out by customarily accepted methods to reflect the effect of constituents upon the sewage works and to determine the existence of hazards to life, limb, and property. (The particular analyses involved will determine whether a twenty-four (24) hour composite of all outfalls of a premise is

appropriate or whether a grab sample or samples should be taken. Normally, but not always, BOD and suspended solids analyses are obtained from 24 hour composite of all outfalls where pH's are determined from periodic grab samples).

10. No statement contained in this article shall be construed as preventing any special agreement or arrangement between the City and any industrial concern whereby an industrial waste of unusual strength or character may be accepted by the City for treatment, subject to payment, therefore, by the industrial concern.

6-2-8 PROTECTION FROM DAMAGE.

1. No unauthorized person shall maliciously, willfully, or negligently break, damage, destroy, uncover, deface, or tamper with any structure, appurtenance, or equipment which is a part of the sewage works. Any person violating this provision shall be subject to immediate arrest under charge of disorderly conduct.

(Code of Iowa, Sec. 716.1)

6-2-9 POWERS AND AUTHORITY TO INSPECTORS.

1. The Superintendent and other duly authorized employees of the City bearing proper credentials and identification shall be permitted to enter all properties for the purpose of inspection, observation, measurement, sampling, and testing in accordance with the provisions of this Ordinance. The Superintendent or the Superintendent's representatives shall have no authority to inquire into any processes including metallurgical, chemical, oil, refining, ceramic, paper, or other industries beyond that point having a direct bearing on the kind and source of discharge to the sewers or waterways or facilities for waste treatment.

2. While performing the necessary work on private properties referred to in 6-2-9(1), the Superintendent or duly authorized employees of the City shall observe all safety rules applicable to the premises established by the company and the company shall be held harmless for injury or death to the City employees and the City shall indemnify the company against loss or damage to its property by the City employees and against liability claims and demands for personal injury or property damage asserted against the company and growing out of the gauging and sampling operation, except as such may be caused by negligence or failure of the company to maintain safe conditions as required in Section 6-2-5(8).

3. The Superintendent and other duly authorized employees of the City bearing proper credentials and identification shall be permitted to enter all private properties through which the City holds a duly negotiated easement for the purposes of, but not limited to, inspection, observation, measurement, sampling, repair, and maintenance of any portion of the sewage works lying within said easement. All entry and subsequent work, if any, on said easement, shall be done in full accordance with the terms of the duly negotiated easement pertaining to the private property involved.

6-2-10 PENALTIES.

1. Any person found to be violating any provision of this Ordinance except Section 6-2-6 shall be served by the City with written notice stating the nature of the violation and providing a reasonable time limit for the satisfactory correction thereof. The offender shall, within the period of time stated in such notice, permanently cease all violations.

2 Any person violating any of the provisions of this Ordinance is liable to the City for any expense, loss, or damage occasioned the City by reason of such violations.

6-3-1 **ENFORCEMENT.** The Superintendent of public utilities (Director of Public Works) shall supervise the installation of water service pipes and their connections to the water main and enforce all regulations pertaining to water services in this City in accordance with this chapter. This chapter shall apply to all replacements of existing service pipes as well as to new ones. The City Council shall make such rules, not in conflict with the provisions of this chapter, as needed for the detailed operation of the waterworks. In the event of an emergency the Superintendent may make temporary rules for the protection of the system until due consideration by the City Council may be had.

(Code of Iowa, Sec. 372.13(4))

6-3-2 **ADOPTION OF STATE PLUMBING CODE.** The installation of any water-service pipe and any connection with the municipal water system shall comply with all pertinent and applicable provisions, whether regulatory, procedural or enforcement provisions, of the State Plumbing Code as amended and as published by the Iowa Department of Public Health, which is hereby adopted. An official copy of the State Plumbing Code as adopted and a certified copy of this Ordinance are on file in the office of the City Clerk for public inspection.

6-3-3 **PLUMBER REQUIRED.** All installation of water service pipes and connections to the municipal water system shall be made by a competent plumber licensed by the State of Iowa (if or when so required by the State of Iowa). The Superintendent shall have the power to suspend the privilege of any plumber to work in the City for violation of any of the provisions of this Ordinance. A suspension, unless revoked, shall continue until the next regular meeting of the City Council. The Superintendent shall notify the plumber immediately by personal written notice of the suspension, the reasons for the suspension, and the time and place of the City Council meeting at which the plumber will be granted a hearing. At this City Council meeting the Superintendent shall make a written report to the City Council stating the Superintendent's

reasons for the suspension, and the City Council, after fair hearing, shall revoke the suspension or take any further action that is necessary and proper.

6-3-4 **MANDATORY CONNECTIONS.** All residences and business establishments within the City limits intended or used for human habitation, occupancy or use shall be connected to the public water supply if it is reasonably available and if the building is not furnished with pure and wholesome water from some other source.

6-3-5 **PERMIT & FEES.** Before any person, firm, corporation or other association shall make a connection with the public water system, a permit must be obtained from the Superintendent. The application for the permit shall be filed with the Superintendent in such format as specified by the Superintendent. The application shall include a legal description of the property, the name of the property owner and the name and address of the person who will do the work. No different or additional uses shall be allowed except by permission of the Superintendent. The Superintendent shall issue the permit if the proposed work meets all the requirements of this Ordinance and if all fees required as determined by Resolution of the City Council have been paid. The Superintendent may at any time revoke the permit for any violation of this Ordinance and require that the work be stopped. The owner or plumber may appeal such action in the manner provided in Section 6-3-3 of this Ordinance.

(Code of Iowa, Sec. 372.13(4))

6-3-6 **RESPONSIBILITY FOR WATER SERVICE PIPE & FAILURE TO MAINTAIN.** All costs and expenses incident to the installation, connection, and maintenance of the water service pipe from the water supply control valve (corporation stop) shall be the responsibility of the owner. The owner shall indemnify the City from any loss or damage that may directly or indirectly occur by the installation or maintenance of said pipe including freezing, settling, etc.

When any portion of the water service pipe that is the responsibility of the property owner becomes damaged, defective, or creates a nuisance and the owner fails to correct said nuisance or repair said problem, the City may do so and assess the costs thereof to the property.

(Code of Iowa, Sec. 364.12 (3)(a & h))

6-3-7 **WATER SUPPLY CONTROL.** The plumber who makes the connection to the municipal water system shall install a main shut-off valve of the inverted key type on the water-service pipe near the curb with a suitable lock of a pattern approved by the Superintendent. The shut-off valve shall be covered with a heavy metal cover having the letter "W" marked thereon, visible and even with the pavement or ground.

The plumber also shall install a shut-off valve and waste cock on every service pipe inside the building near the entrance of the water-service pipe into the building; this must be located so that the water can be shut off conveniently and the pipes drained. Where one service pipe is installed to supply more than one customer, there shall be separate shut-off valves inside the building for each customer so that service to one customer can be shut off without interfering with service to the others.

6-3-8 MAKING THE CONNECTION. Any connection with the municipal water system must be made under the direct supervision of the Superintendent or the Superintendent's authorized assistant. All taps in the water main must be at least 18 inches apart and on the side and near the top and not in any case within 18 inches of the hub.

(Code of Iowa, Sec. 372.13(4))

6-3-9 EXCAVATIONS. Excavations to do work under this Ordinance shall be dug so as to occasion the least possible inconvenience to the public and to provide for the passage of water along the gutter. All such excavations shall have proper barricades at all times, and warning lights placed from one-half hour before sunset to one-half hour after sunrise. In refilling the excavation the earth must be laid in layers and each layer tamped thoroughly to prevent settlement, and this work, and any street, sidewalk, pavement or other public property that is affected, must be restored to as good a condition as it was previous to the excavation. The plumber must maintain the affected area in good repair to the satisfaction of the City Council for three months after refilling. All water service pipes must be laid so as to prevent rupture by settlement or freezing. No excavation shall be made within six (6) feet of any laid water or sewer pipe while the ground is frozen, and no water or sewer pipe shall be exposed to frost, except by special written permission of the Superintendent.

6-3-10 INSPECTION AND APPROVAL. All water-service pipes and their connections to the municipal water system must be inspected and approved by the Superintendent before they are covered, and the Superintendent shall keep a record of such approvals. If the Superintendent refuses to approve the work, the plumber or owner must proceed immediately to correct the work so that it will meet with the Superintendent's approval. Every person who uses or intends to use the municipal water system shall permit the Superintendent or the Superintendent's authorized assistants to enter the premises to inspect and make necessary alterations or repairs at all reasonable hours and on proof of authority.

(Code of Iowa, Sec. 372.13(4))

6-3-11 COMPLETION BY THE CITY. Should any excavation be left open or partly refilled for twenty-four (24) hours after the water-service pipe is installed and connected with the municipal water system, or should the work be improperly done, the Superintendent shall have the right to finish or correct the work, and the City Council shall assess the costs to the property owner or the plumber. If the plumber is assessed, the plumber must pay the costs before the plumber can receive another permit, and the plumber's bond required by the Plumbing Ordinance shall be security for the assessment. If the property owner is assessed, such assessment shall be collected with and in the same manner as general property taxes.

(Code of Iowa, Sec. 364.12(3)(h))

6-3-12 METERS REQUIRED AND TESTING. All water shall be supplied through meters that accurately measure the amount of water supplied to any building. All meter installations shall be inspected and approved by the Superintendent. The Superintendent, or other official as authorized by the Council, shall make a test of the accuracy of any water meter at any time when requested in writing. If it is found that such meter overruns to the extent of fifty percent (50%) or more, the cost of the tests shall be paid by the City and a refund shall be made to the customer for overcharges collected since the last known date of accuracy but not for longer than three (3)

months. If the meter is found to be accurate or slow less than fifty percent (50%) fast, the patron shall pay the reasonable costs of the tests.

Accuracy Check. The accuracy of water meters may be checked for accuracy at the request of households, City employees, or City Council members.

6-3-13 FIRE SPRINKLER SYSTEM CONNECTIONS. Fire sprinkler systems may be connected to water mains by direct connection without meters under the direct supervision of the Superintendent. No open connection can be incorporated into the system, and there shall be no valves except a main control valve at the entrance to the building which must be locked open.

6-3-14 LOCATION AND SETTING OF METERS. All meters shall be so located that they are easily accessible to meter readers and repairmen. Meters should be placed within the main building on the property with an exterior read-out located near the electric meter wherever feasible. Meters should be protected from freezing temperatures. Property owners shall provide all necessary piping and fittings for the proper setting of the meter including a valve on the discharge side of the meter. In cases where it is impractical to place the meter in the main building, the Superintendent may approve placement of the meter in another location. Water meter pits must be of a design acceptable to the Superintendent. The meter must be accessible at the ground level and the pit designed in such a manner as to adequately protect the meter from vandalism, freezing, or other damage.

6-3-15 RIGHT OF ENTRY. The Superintendent, or other official as authorized by the Council, shall be permitted to enter the premises of any property owner at any reasonable time to read, remove, or change a water meter.

6-3-16 METER REPAIRS. Whenever a water meter is found to be out of order the Superintendent shall have it repaired. If it is found that damage has occurred due to the carelessness or negligence of the property owner or customer, including such events as tampering with the meter or allowing it to freeze, then the property owner shall be liable for the cost of repairs and water service will be discontinued until such repairs are made and paid for by the owner. If the Superintendent determines it is in the best interest of the City and the water system, any such repairs not paid by the property owner may be corrected by the City. If the owner does not reimburse the City for the cost of such repairs, such costs shall constitute a lien upon the property and said lien shall be collected in the same manner as taxes.

6-3-17 LAWN AND EXTERIOR WATERING METERS. Meters may be installed to measure water that is used exclusively for lawn, landscaping, or other exterior uses. Exterior watering meters shall be purchased from the City, installed at the expense of the property owner or customer, and inspected and approved by the Superintendent.

6-3-18 REQUIRED MOVEMENT OF WATER METERS. Whenever a broken or malfunctioning meter is replaced and the current location of a meter is deemed inaccessible or unsafe by the Superintendent, the Superintendent may require movement of the meter to the main building or another location. All costs of moving an existing meter shall be the responsibility of the property owner.

6-3-19 TAMPERING WITH METERS. Any user or person (on behalf of a user) who causes water provided by the City to bypass the City's meter and/or alters the service line, fixture, appliance, or meter so as to prevent the property measurement of water used shall be in violation of this chapter and subject to the penalties outlined in Title I, Chapter 3 of the Templeton Code of Ordinances.

6-7-12 **MINIMUM IMPROVEMENTS.** The improvements set forth below shall be considered the minimum improvements necessary to protect the public health, safety and welfare.

(Code of Iowa, Sec. 364.1)

1. **Streets.** The subdivider of land being subdivided shall provide the grading of the entire street right-of-way, alley or public place and provide appropriate paving, including curb and gutter on all streets. All streets or alleys shall be of such width and shall be so constructed as to meet the standards of the City. Under some circumstances the City may require, as a condition for approval of the plat, dedication and improvement of a street having a width greater than necessary to meet the needs of the platted area, but necessary to complete the City street system as it relates to both the area being platted and other areas. In such event, the City will pay the subdivider the difference in cost of improving the wider street and the street width reasonable to meet the foreseeable needs of the subdivision taken alone. The streets shall, upon final approval and acceptance by the City, become the property of the City.

2. **Sanitary Sewer System.** The subdivider of the land being platted shall make adequate provision for the disposal of sanitary sewage from the platted area with due regard being given to present or reasonably foreseeable needs. Under some circumstances the City may require, as a condition for approval of the plat, installation of a sanitary sewer that is larger than necessary to meet the needs of the platted area, but necessary to complete the City sanitary sewer system as it relates to both the area being platted and other areas. In such event, the City will pay the subdivider the difference in cost of pipe and installation between the larger sewer and the diameter of sewer reasonable to meet the foreseeable needs of the area.

The above mentioned facilities for the collection and disposal of sanitary sewage from the platted area shall, upon final approval and acceptance by the City, become the property of the City.

3. Storm Sewer System. The subdivider of land being platted shall install and construct a storm sewer system adequate to serve the area, including anticipated extension of use to serve additional areas. The storm sewer system shall be constructed in accordance with plans and specifications of the City and at sewer grades established by the City.

Under some circumstances the City may require, as a condition for approval of the plat, installation of a storm sewer system that is larger than necessary to meet the needs of the platted area, but necessary to complete the city storm sewer system as it relates to both the area being platted and other areas. In such event, the City will pay the subdivider the difference in cost of pipe and installation between the larger sewer and the diameter of sewer reasonable to meet the foreseeable needs of the area.

The sewers shall, upon inspection, approval and acceptance by the City, become the property of the City. In the storm sewer design phase, consideration shall be given to alternatives and principles of storm water management, or the provisions of a storm water management plan if such plan has been adopted by the City.

4. Water Main System. The subdivider of land being platted shall install and construct a water main system to adequately serve all lots or parcels of land within the platted area, with due regard to the present and reasonably foreseeable needs of the entire area, and shall connect the same to the City's existing water mains.

Under some circumstances the City may require, as a condition for approval of the plat, installation of a water main that is larger than necessary to meet the needs of the platted area, but necessary to complete the City water distribution system as it relates to both the area being platted and other areas. In such event the City will pay the subdivider the difference in cost of pipe and installation between the larger water main and the diameter of water main reasonable to meet the foreseeable needs of the area.

The water mains shall, upon inspection, approval, and acceptance by the City, become the property of the City.

5. Other Improvements. The owner and subdivider of the land being platted shall be responsible for the installation of sidewalks as so required within the street area; the installation of walkways as necessary; grading, seeding or sodding of all lots; the planting of any required trees in the parking area; the installation of street signs, and the provision of street lighting. All

such improvements shall be under the direction of the City Engineer or director of the electric utility, as appropriate.

1. Public Utilities. Where alleys are not provided, or where otherwise required by the present or future placement of public utilities, easements of not less than ten (10) feet in width shall be granted by the owner along rear, and where necessary, along side lot lines for public utility requirements. Except where prohibited by topography, such easements shall be centered on lot lines. Easements of greater width may be required along lot lines, or across, lots when necessary for the placement and maintenance of utilities. No buildings or structures, except as necessary for utilities, shall be permitted on such easements.

2. Easements Along Streams and Watercourses. Wherever any stream or surface watercourse is located in an area that is being subdivided, the subdivider shall, at said subdivider's expense, make adequate provisions for the proper drainage of surface water and shall provide and dedicate to the City an easement along said stream or watercourse as necessary for the proper maintenance of the watercourse, and as approved by the City.

The owner and subdivider of the land being platted shall be required to provide to the City, proper maintenance bonds satisfactory to the City, so as to insure that for a period of one (1) year from the date of acceptance of any improvement, the owner and subdivider shall be responsible to maintain such improvement in good repair.

6-7-15 ALTERNATIVE SYSTEMS FOR SEWER OR WATER. Where connection to the City sewer or water system cannot reasonably be made the City may approve alternate facilities for the distribution of water or the collection and disposal of sanitary wastes. Such alternate systems shall be designed to fully protect the public health safety and welfare, and shall meet all requirements of state, county, or other applicable health regulations. Prior to granting approval of such alternate systems, the City shall require that the owner and subdivider provide to the City a waiver of assessment protest or such other legally binding documents necessary to protect the City from the expense of the subsequent installation of sewer or water facilities.

If land is found to be unsuitable for subdivision for any of the reasons cited in this Section, the City Council shall state its reasons in writing and afford the subdivider an opportunity to present data regarding such unsuitability. Thereafter, the City Council may reaffirm, modify or withdraw its determination regarding such unsuitability.

Such technical standards for public improvements shall contain the minimum acceptable specifications for the construction of public improvements. Such technical standards may vary for classes of improvements, giving due regard to the classification of streets or other improvements, and the extent and character of the area served by the improvements.

Upon adoption by the City Council by resolution, such technical standards for public improvements shall have such force and effect as if they were fully set forth herein.

1. The City Clerk, upon receipt of fifteen (15) copies of the preliminary plat, shall file one copy in the records of the City, shall forward one copy to the Director of Public Works, shall retain one copy for public inspection, and shall forward the remaining copies of the plat to the Plats Officer.

2. The Plats Officer shall provide copies of the plat to the City Engineer, and such other persons as necessary to review the plat; and shall schedule the plat for consideration by the Planning Commission.

3. The Planning Commission shall examine the plat and the report of the City Engineer, and such other information as it deems necessary or desirable, to ascertain whether the plat conforms to the ordinances of the City, and conforms to the Comprehensive Plan and other duly adopted plans of the City. The Planning Commission shall, within forty-five (45) days of the filing of the plat with the City Clerk, forward a report and recommendation regarding the plat to the City Council. If such recommendation is to disapprove or modify the plat, the reasons therefor shall be set forth in writing in the report, and a copy of the report and recommendation shall be provided to the applicant.

4. The City Council shall examine the plat, the report of the City Engineer, the report of the Planning Commission, and such other information as it deems necessary or desirable. Upon such examination, the City Council shall ascertain whether the plat conforms to the ordinances and standards of the City, conforms to the Comprehensive Plan and other duly adopted plans of the City, and will be conducive to the orderly growth and development of the City; in order to protect the public health, safety, and welfare. Following such examination, the City Council may approve, subject to conditions, or disapprove the plat. If the decision of the City Council is to disapprove the plat, or to approve the plat subject to conditions, the reasons therefor shall be set forth in writing in the official records of the City Council, and such decisions shall be provided to the applicant. Action on the preliminary plat by the City Council shall be taken within sixty (60) days of the filing of the plat with the City Clerk.

6-7-32 DURATION OF APPROVAL OF PRELIMINARY PLAT. The approval of a preliminary plat by the City Council shall be valid for a period of one (1) year from the date of such approval; after which such approval shall be void, and the subdivider shall take no action

requiring the precedent approval of a preliminary plat except upon application for and approval of an extension of such period of validity, by the City Council.

6-7-33 AUTHORIZATION TO INSTALL IMPROVEMENTS. The approval of the preliminary plat shall constitute authorization by the City Council for the installation of improvements as required by this ordinance, and as shown on the preliminary plat; provided no such improvement shall be constructed or installed until and unless the plans, profiles, cross sections, and specifications for the construction of such improvement have been submitted to, and approved in writing by, the City Engineer.

6-7-34 COMPLETION AND ACCEPTANCE OF IMPROVEMENTS. Before the City Council will approve the final plat, all of the foregoing improvements shall be constructed and accepted by formal resolution of the City Council. Before passage of said resolution of acceptance, the City Engineer shall report that said improvements meet all City specifications and ordinances or other City requirements, and the agreements between the subdivider and the City.

6-7-35 PERFORMANCE BOND PERMITTED. In lieu of the requirement that improvements be completed prior to the approval of a final plat, the subdivider may post a performance bond with the City, guaranteeing that improvements not completed shall be completed within a period of two (2) years from the date of approval of such final plat; but such approval of the plat shall not constitute final acceptance of any improvements to be constructed. Improvements will be accepted only after their construction has been completed.

6-7-36 REQUIREMENT OF THE FINAL PLAT. The subdivider shall, within one (1) year from the date of approval of the preliminary plat, unless such time period has been extended, prepare and file with the City Clerk, five (5) copies of the final plat and required attachments, as set forth in this ordinance. Except for a final plat for a minor subdivision or an auditor's plat as set forth herein, no final plat shall be considered by the City Council until and unless a preliminary plat for the area included in the proposed final plat has been approved and has not expired and become void as set forth above.

The final plat shall be drawn at a scale of one inch equals one hundred feet (1" = 100') or larger. Sheet size shall be no greater than eighteen inches by twenty-four inches (18" x 24") nor smaller than eight and one-half inches by eleven inches (8 1/2" x 11") and shall be of a size acceptable to the County Auditor. If more than one sheet is used, each sheet shall clearly show the number of the sheet, the total number of sheets included in the plat, and match lines indicating where other sheets adjoin.

7. All adjoining properties shall be identified, and where such adjoining properties are a part of a recorded subdivision, the name of that subdivision shall be shown. If the subdivision platted is a resubdivision of a part or the whole of a previously recorded subdivision, sufficient ties shall be shown to controlling lines appearing on the earlier plat to permit an overlay to be made. Resubdivision shall be labeled as such in a subtitle following the name of the subdivision wherever the name appears on the plat.
(Code of Iowa, Sec. 355.8(18))
8. Street names and clear designation of public alleys.
(Code of Iowa, Sec. 354.6(2))
9. Block and lot numbers.
(Code of Iowa, Sec. 354.6(2))
10. Accurate dimensions for any property to be dedicated or reserved for public use, and the purpose for which such property is dedicated or reserved for public use.

(Code of Iowa, Sec. 355.8(21))

6-7-37 ATTACHMENTS TO THE FINAL PLAT. The following shall be attached to and accompany any final plat:

1. A certificate by the owner and said owner's spouse, if any, that the subdivision is with their free consent, and is in accordance with the desire of the owner and spouse. 6. The encumbrance bond, if any, as specified in Sections 354.11 and 354.12, Code of Iowa.

(Code of Iowa, Sec. 354.11(2) and 354.12)

7. A statement of restrictions of all types that run with the land and become covenants in the deeds of lots.

8. A certificate by the City Engineer that all required improvements have been satisfactorily completed in accordance with the construction plans as approved and in substantial

compliance with the approved preliminary plat. Prior to such certification, "as built" plans for all improvements shall have been provided to the City Engineer. In lieu thereof, the City Clerk may certify that a performance bond guaranteeing completion has been approved by the City Attorney and filed with the Clerk, or that the City Council has agreed that the City will provide the necessary improvements and installations and assess the costs against the subdivider of future property owners in the subdivision.

9. Where the improvements have been installed, a resolution accepting and approving such improvements along with the maintenance bond required by this ordinance.

A copy of the findings shall be provided to the subdivider.

4. If the plat is found to substantially conform to the preliminary plat as approved, the final plat shall be forwarded to the City Council for review. If the plat is found not to conform to the preliminary plat, it shall be referred to the Planning Commission for review, prior to review by the City Council. The Planning Commission shall then review the plat and shall forward a written recommendation thereon to the City Council within forty-five (45) days of the filing of the plat with the City Clerk. If the recommendation is to disapprove the plat, or to require modification of the plat, the reasons therefor shall be set forth in writing, and a copy of the recommendation shall be provided to the subdivider.

OTHER PROVISIONS

6-7-39 VARIANCES. Where, in the case of a particular proposed subdivision, it can be shown that strict compliance with the requirements of this ordinance would result in extraordinary hardship to the subdivider, because of unusual topography or other conditions, the City Council may vary, modify or waive the requirements so that substantial justice may be done and the public interest secured, provided, however, that such variance modification or waiver will not have the effect of nullifying the intent and purpose of this ordinance. In no case shall any variance or modification be more than minimum easing of the requirements as necessary to eliminate the hardship. In so granting a variance, the City Council may impose such additional conditions as are necessary to secure substantially the objectives of the requirements so varied, modified, or waived.

6-8-3 CLEANING SNOW, ICE, AND ACCUMULATIONS. It shall be the duty of the owner to keep sidewalks abutting the owner's property clear of the natural accumulations of snow or ice. If the owner fails to do so within twenty four (24) hours after deposit of accumulation, the Mayor may have the natural accumulations of snow or ice removed without notice to the property owner. The Mayor shall give the Council an itemized and verified statement of the removal costs and a legal description of the property at the next regular Council meeting. The costs shall be reviewed by the Council, and if found correct, shall be assessed against the property as taxes. The City Clerk shall be directed to certify the costs to the County Treasurer for collection as provided in Section 364.12 of the Code of Iowa.

(Code of Iowa, Sec. 364.12(2b) and (2e))

6-8-4 MAINTENANCE RESPONSIBILITY. The abutting property owner or owners shall be responsible for the repair, replacement or reconstruction of all broken or defective sidewalks to a safe condition and to maintain in a safe condition all sidewalks in the abutting street right-of-way.

6-8-5 LIABILITY OF ABUTTING OWNER. As provided in Section 364.14, Code of Iowa, in the event the owner of property abutting any public sidewalk fails or refuses to perform any act required of them by this Ordinance and in the event an action is brought against the City for personal injuries alleged to have been caused by a defect in or the condition of said sidewalk, the City may notify in writing the said abutting owner that it claims the injury was caused by their negligence and/or their failure to repair the defect or eliminate the condition complained of. The notice shall state the pendency of the action, the name of the plaintiff, the name and location of the court where the action is pending, a brief statement of the alleged facts from which the cause arose, that the City believes that the person notified is liable to it for any judgment rendered against the City, and asking the person to appear and defend.

A judgment obtained in the suit is conclusive in any action by the City against any person so notified, as to the existence of the defect or condition or other cause of the injury or damage, as to the liability of the City to the plaintiff in the first named action, and as to the amount of the damage or injury. The City may maintain an action against the person notified to recover the amount of the judgment together with all the expenses incurred by the City in the suit.

(Code of Iowa, Sec. 364.14)

6-8-6 ORDERING SIDEWALK IMPROVEMENTS. The City Council may order the construction, reconstruction, repair, or replacement of permanent sidewalks upon any street or court. Notice of this order shall be sent to the owner by certified mail. The notice shall include the fact that the owner may request a hearing by the Council within fifteen (15) days or receipt of the notice.

6-8-7 REPAIRING DEFECTIVE SIDEWALKS. It shall be the duty of the abutting property owner at any time, or upon receipt of thirty (30) days' notice from the City, to repair, replace, or reconstruct all broken or defective sidewalks in the abutting street right-of-way. If, after the expiration of the thirty (30) days as provided in the notice, the required work has not been done or is not in the process of completion, the Mayor shall order the work to proceed to repair, replace, or reconstruct the sidewalk. Upon completion of the work, the Mayor shall submit to the Council an itemized and verified statement of expenditures for material and labor, and the legal description of the property abutting the sidewalk on which work has been performed. These costs shall be assessed to the property as taxes. The City Clerk shall be directed to certify the costs to the County Treasurer for collection as provided in Section 364.12 of the Code of Iowa.

(Code of Iowa, Sec. 364.12(e))

6-8-8 NOTICE OF INABILITY TO REPAIR OR BARRICADE. It shall be the duty of the owner of the property abutting the sidewalk, or of the contractor or agent of the owner, to notify the City immediately in the event the owner is unable to make necessary sidewalk improvements or to install or erect warnings and barricades as required by this chapter.

6-8-9 STANDARD SIDEWALK SPECIFICATIONS. Sidewalks constructed, repaired, or replaced under the provisions of this chapter shall be of the following construction and meet the following standards:

1. Portland cement concrete shall be the only material used in the construction and repair of sidewalks unless otherwise authorized by the City Council.
2. Sidewalks shall be on one-course construction.
3. Concrete may be placed directly on compact and well-drained soil. Where soil is not well drained, a four (4) inch sub-base of compact, clean, coarse gravel, sand, or cinders shall be laid. The adequacy of the soil drainage is to be determined by the Superintendent of Public Works.
4. The sidewalk bed shall be graded to the established grade.
5. Residential sidewalks shall be at least four (4) feet wide, or match existing sidewalks, and four (4) inches thick, and each section shall be no more than four (4) feet in length. Each section shall be four (4) inches thick and no more than six (6) feet in length and width. All driveway areas shall not be less than six (6) inches in thickness.

6. Residential sidewalks shall be located with the inner edge (edge nearest the abutting private property) on the property line, unless the Council shall establish a different distance due to the circumstances.

7. All elevations of sidewalks are to be established by the City Council with assistance from the Director of Public Works on a case-by-case basis.

8. All sidewalks shall slope at least one-quarter (1/4) inch per foot toward the curb, but in no event more than one-half (1/2) inch per foot toward the curb unless so approved by the Director of Public works due to unusual topography or grade, adjacent buildings, or other unusual factors in the specific area.

9. All sidewalks shall have a steel trowel finish followed by a "broom" or a "wood float" finish.

10. Ramps for the disabled. There shall not be less than two (2) curb cuts or ramps per lineal block which shall be located on or near the cross-walks at intersections. Each curb cut or ramp shall be at least thirty (30) inches wide, shall be sloped at not greater than one inch of rise per twelve (12) inches lineal distance, except that a slope no greater than one inch of rise per eight (8) inches lineal distance may be used where necessary, shall have a nonskid surface, and shall otherwise be so constructed as to allow reasonable access to the crosswalk for physically disabled persons using the sidewalk.

(Code of Iowa, Sec. 216C.9)

11. All sidewalk improvements on public property, whether performed by the owner of the abutting property or by the City, shall be performed under the supervision and inspection of the City Director of Public Works, and in accordance with the standard sidewalk specifications set forth in this chapter.

6-8-10 PERMITS FOR CONSTRUCTION OR REMOVAL. No person shall make any sidewalk improvements unless such person shall obtain a permit from the City Clerk in accordance with Section 306 of the City of Templeton Zoning Ordinance.

6-8-11 FAILURE TO OBTAIN PERMIT; REMEDIES. Whenever any sidewalk improvements are made that do not conform to the provisions of this chapter and with the specifications, or when any sidewalk improvements are made without a permit, the Mayor shall serve notice to obtain a permit upon the property owner and upon the contractor doing the work. If the sidewalk is in the course of construction, the notice shall order the work to stop until a permit is obtained and the work is corrected to comply with the specifications. If the sidewalk work has been completed, the owner shall obtain a permit immediately and perform any needed corrections within five (5) days from receipt of the permit. If the owner fails to comply with this notice, the Mayor shall have the work completed and the costs assessed to the property owner as provided in this chapter.

6-8-12 INSPECTION AND APPROVAL. Upon final completion, the Director of Public Works shall inspect the work and may order corrections if the work does not meet specifications. When the work does meet all requirements of this chapter, the specifications, and the permit, the Director of Public Works shall indicate this on both copies of the permit.

6-8-13 BARRICADES AND WARNING LIGHTS. Proper warning lights and barricades shall be placed to protect persons from materials, equipment, and dangerous conditions. Placement and maintenance of adequate warnings is the responsibility of the constructor, the owner, and the lessee of the property.

6-8-14 INTERFERENCE WITH SIDEWALK IMPROVEMENTS. No person shall knowingly or willfully drive any vehicle upon any portion of any sidewalk or approach thereto while it is in the process of being improved, or upon any portion of any completed sidewalk or approach thereto, or shall remove or destroy any part or all of any sidewalk or approach thereto, or shall remove, destroy, mar, or deface any sidewalk at any time or destroy, mar, remove, or deface any notice or warning device provided by this chapter.

6-8-15 SPECIAL ASSESSMENTS FOR CONSTRUCTION AND REPAIR. The City Council may assess the cost of initial construction, improvements, and/or repair of sidewalks in the City according to the special assessment procedures established in Chapter 384, division IV, Code of Iowa.

(Code of Iowa, Sec. 384.38)

6-8-16 NOTICE OF ASSESSMENT FOR REPAIR OR CLEANING COSTS. When the Mayor submits a bill for sidewalk improvements or for removal of accumulations as provided in this chapter, the City Clerk shall send a notice of such facts to the owner of the abutting property. The notice may be given either by personal service or by certified mail to the last known address of the owner. The notice shall contain a statement of the work performed, the cost of the work that is being assessed, a description of the property affected, and the fact that the person may pay the amount assessed within thirty (30) days without interest or penalty. The notice also shall indicate that the person may object to such assessment and given the place and time at which Council will hear such objections. The time set for hearing shall be at least fifteen (15) days after the service or mailing of the notice.

(Code of Iowa, Sec. 384.50)

6-8-17 HEARING AND ASSESSMENT. At the time and place designed in the Notice, the Council shall consider all objections to the assessment, correct all errors or omissions, and adopt a corrected list as the amounts to be assessed against the property.

(Code of Iowa, Sec. 384.51)

6-8-18 BILLING AND CERTIFYING TO COUNTY. Thirty (30) days after the Council's decision, the City Clerk shall certify any unpaid amounts to the County Treasurer. The unpaid assessments shall constitute a lien against the property and shall be collected by the County Treasurer in the same manner as other taxes. Any assessment that exceeds \$100 may be paid in installments as set by Council, not exceeding ten, in the same manner and at the same interest rates as for special assessments under Chapter 384, division IV, Code of Iowa. No interest shall

be charged for assessments, or parts thereof, paid within thirty (30) days of the time the Council determined the final amounts.

(Code of Iowa, Sec. 384.60)

6-8-19 ADAAG COMPLIANCE. All construction, repair, and maintenance of sidewalks shall comply with Americans with Disabilities Guidelines (ADAAG).

6-9-3	Planting Restrictions	6-9-8	Trimming Trees to Be Supervised
6-9-4	Duty to Trim Trees	6-9-10	Removal of Trees
6-9-5	Growth of Offensive Vegetation Prohibited

6-9-2 **DEFINITIONS.** For use in this Chapter, the following terms are defined:

1. “Offensive Vegetation” includes all noxious weeds as defined in Chapter 317 of the Code of Iowa and all other weeds which are not otherwise included in Chapter 317 but which are commonly held to be offensive to sight and/or smell. The term includes all grasses not otherwise offensive which have reached a height of twelve inches or more unless otherwise excluded by the following provisions of this subsection. Offensive vegetation shall not include properly maintained and manicured shrubbery, trees, flowers and other vegetation designed for aesthetic landscaping purposes, nor shall the term include garden vegetables customarily grown for home use in a garden, provided the garden is regularly maintained and otherwise free from the type of offensive vegetation that this chapter seeks to eliminate.

2. Spacing. Trees shall not be planted on any parking which is less than nine (9) square feet in width, or contains less than eighty-one (81) square feet of exposed soil surface per tree. Trees shall not be planted closer than twenty (20) feet from street intersections (property lines extended) and ten (10) feet from driveways. If it is at all possible trees should be planted inside the property lines and not between the sidewalk and the curb.

3. Prohibited Trees. No person shall plant in any street any fruit-bearing tree or any tree of the kinds commonly known as cottonwood, poplar, boxelder, Chinese elm, or evergreens of any variety.
